EARNING

| Summe | | | |
|-------|---|---|--|
| 2 | Fixperts mini project – designing a product to help users with disabilities – eg small gadget to open a bottle top or remove a plug from a wall. (mock of Unit R107 and 8 which will be completed in year 10/early 11). Combines practical and theory covered to date as part of the project. Product Analysis and disassembly to inform ideas | Coursework Continuation of R107: 1) LO2 completion- Developing designs using engineering drawing techniques and annotation through hand drawn and use of CAD. | Completion of R108 Coursework areas Exam resit preparation June – 2 nd resit of exam if required. |
| | research, design, model, make and evaluate. Research- understanding the problem given through investigation/existing products/product disassembly/client information Producing ideas by hand (2D and in isometric) 2D Design and Fusion 360 modelling to develop idea (using CAD) Producing an engineering plan of product to be made using CAD – fusion 360. Modelling the idea to produce a mock up/prototype (Styrofoam, finishing, painting) Testing and Evaluation Theory – Recapping and revisiting of previous topics covered in term 1 and 2. Mini | annotatio n through use of ICT. 2) L03 completion Use of CAD software and techniques to produce and communicate design proposals Theory. 1 lesson per week. -Revisiting of topics from year 9. -Exam question practice to form assessment opportunities. | |
